

Inspired Concrete... Create **it**. Protect **it**.

INTERIOR WALL FINISHES

PRODUCT SELECTION &
DESIGN INSPIRATION

One of the hottest trends within interior design is specialty wall finishes. With ARTISAN SYSTEMS from SureCrete, you can design and create surfaces that go beyond what other materials can do. No need to hang a piece of art on the wall, when the wall is a piece of art.

STEPS AND PROCEDURES

SELECTION OF MATERIALS

With **ARTISAN Interior Wall Finish systems, YOU get to choose the look.**

For installations over existing drywall, masonry surfaces or composite surfaces, our **MICROTEK** and **SURESPRAY** products can be installed in thin sections to create a range of **smooth to subtle texture** that evokes a hand-hewn quality. These systems can also be installed as shower surrounds, with properly prepared and waterproofed substrates.

For **stone-like** finishes where dramatic texture and relief are desired, SureCrete's **WALLSTAMP** is an innovative material that mimics the appearance of natural stone or stone slabs, without the weight and complicated installation process.

The combination of these products paired with limitless creativity, allow for one of a kind surfaces meeting a variety of design criteria.

01

PREP IT. Surface Preparation

SCR Super Concrete Renovator: Combines three products in one; a strong detergent, degreaser, and acid to ensure proper cleaning and etching for concrete overlays, stains and sealers.*

ELASTOSHIELD: Elastomeric membrane for waterproofing and crack presentation.

**Refer to International Concrete Repair Institute Guidelines for surface prep and profile numbers for your specific project, along with SureCrete Technical Data Sheets for each overlay products.*

03

TRANSFORM IT. Wall Finish Products

MICROTEK: A just add water, self bonding, cement-based overlay system for interior concrete floors.

Select your product based on wall conditions:

**MICROTEK
Smooth Grade:**
Finish coat

**MICROTEK
One Coat:**
Standard base for rough surfaces

WALLSPRAY: Lightweight, thin, sprayable overlay that can be used to create multiple finishes including antique, sand and knockdown.

WALLSTAMP: Lightweight, vertical, thick build overlay for texturizing or carving three-dimensional surfaces.

Customize colors and enhance visual texture with compatible colors and product (see section 04 for details)

04 ENHANCE IT. Color & Decorate

From subtle to exotic, SureCrete has a wide range of coloring and enhancing materials to personalize your overlay to look perfect no matter what design criteria is desired.

ECO STAIN: 30 semi-transparent water-based concentrate colors. Can be diluted up to 10:1 with water to create a wide range of color intensities. Additionally compatibility to combine colors for an unlimited color palette.

ECO ACCENT: Dry powder concentrate antiquing agent, when mixed with water can be used to enhance visual texture in stamped and textured surfaces.

VIVID Stain: Unlike other coloration methods, VIVID acid stain chemically reacts with the cement-based surface to create a mottled, variegated color that is one-of-a kind. 11 standard colors can be used over both MICROTEK or SURE-STAMP flooring systems.

05 PROTECT IT. Sealers and Finishes

Installing a high-quality protective sealer on your interior wall system will not only make it look great, but also protect it from abrasion, wear and staining.

XS-327: For the ultimate in protection while preserving a natural, non-coated look, XS-327 is a two-component concentrate that is diluted with water for a non-color enhancing, invisible layer of protection.

SUPER WB: Environmentally/VOC friendly, water-based clear acrylic sealer with 30% solids, available in both gloss and low sheen. Creates a more finished, sealed-off appearance.
