

AK - 2

The ideal concrete cure and seal for high-end residential sidewalks, driveways, basement floors, garages, patio and pool decks. As a clear, solvent-based, 25% solids, acrylic/methacrylate resin, it provides outstanding curing and unsurpassed protection of concrete, brick and stone; ensuring the longest life-cycle and low-maintenance enjoyment of indoor and outdoor living spaces.

- SUPERIOR MOISTURE RETENTION
- REDUCED CLEANING & MAINTENANCE
- SPRAYABLE, FAST DRYING FORMULA

BENEFITS

UNSURPASSED CONCRETE PROTECTION

High solids acrylic resins make this the ideal cure and seal for all residential and light traffic concrete and masonry surfaces. Resistance to abrasion, chemicals, stains, yellowing and water only add to its protective capabilities.

OUTSTANDING CURE PERFORMANCE

Moisture retention superior to traditional curing and sealing products, lending itself to proper cement hydration and optimal strength gain in new concrete. Minimizes checking, cracking, spalling and other surface defects that result from improper curing.

IDEAL APPLICATIONS AND USES

A versatile product capable of simultaneously curing and sealing concrete in a multitude of applications. Suitable to protect and enhance any concrete, masonry or cementitious surface, cement based terrazzo, brick, pavers, stone or slate.

MOISTURE EFFICIENCY

.18 kg/m² @ 300 ft²/gallon
(max allowed is .40 kg/m² per ASTM C-1315)

DRYING TIME

- Tack-free in as little as an hour.
- Reopen to traffic in two hours.

Outdoor Living Spaces

Outdoor Structures such as stairway, retaining walls, and pool decks
