**CONCRETE STAIN WB
COLOR CHART**

CONCRETE STAIN WB

TK's Concrete Stain WB is the *ideal/solid* colored stain for *beautifying* and *protecting* concrete and masonry surfaces.

Patios, walkways, pool decks, basement floors and block and stucco walls all benefit from long lasting color retention, resistance to wear and abrasion and protection from damaging substances.

FEATURES AND BENEFITS:

- Results in a painted-look finish that is as rugged as it is beautiful.
- Environmentally-friendly formulation with low VOC (volatile organic compound) content.
- Bonds with the surface to provide a barrier against acids, alkali, gas, oil and ultraviolet rays.
- Will not chip, peel, flake or fade.
- Provides color uniformity and long-lasting color retention.
- Offers improved resistance to wear and abrasion over standard finish coatings.
- May be top coated with a variety of sealers for professionally finished results.
- Single component and fast drying for quick and easy application.

APPLICATIONS:

For interior or exterior use on vertical or horizontal concrete and masonry surfaces. Ideal for beautifying patios, walkways, pool decks, basement floors and block/stucco walls.

AVAILABILITY:

Packaged in 5-gallon pails and 1-gallon cans.

This product's technical data and safety data sheets must be read completely before use.

DISCLAIMER: The examples shown are representations only. Variations in color may occur due to surface texture, substrate absorption, product thickness and light source. Product finish and gloss will vary by product. Color draw downs are available through TK Products for color approval. It is always recommended to apply a mock-up to the actual surface to be coated in order to ensure color approval prior to project start-up.
